

Online Shopping System Documentation Report

Prepared by: Sumaya

1. Introduction

The Online Shopping System is a website that allows users to browse products, learn about the company, and contact the business using HTML, CSS, and JavaScript.

2. Problem Statement

Many small businesses lack an online platform to display products. This project provides an online solution.

3. Objectives

Develop a responsive website, display products, improve user experience, and practice web development skills.

4. Technologies Used

HTML5, CSS3, JavaScript, Visual Studio Code, GitHub.

5. Features

Home, Products, About, Contact, Navigation, Responsive Design.

6. Conclusion

The project demonstrates a simple, responsive online shopping website.
